FOR IMMEDIATE RELEASE

Molex Acquires SDP Telecom

*Global RF/microwave solution provider will expand Molex offerings
for highly-engineered RF solutions*

WALLDORF, Germany – 18th February, 2015 – Molex Incorporated, a leading global interconnect and cable assembly provider, announced that it and certain of its affiliates have acquired SDP Telecom. Headquartered in Montreal, Canada, SDP designs and manufactures RF/microwave solutions for the wireless communications industry.

“Together, Molex and SDP will broaden our RF/Microwave product capabilities and create additional value for our customers in the growing wireless infrastructure market, said Tim Ruff, senior vice president, Molex. “This is a next step towards achieving our vision to offer total integrated solutions to the markets we serve.”

Founded in 1995, SDP brings a successful industry track record innovating RF components and subsystems. In addition to its Montreal, Canada headquarters, SDP has manufacturing facilities in China. SDP will be managed by the RF/Microwave Business Unit that is part of Molex’s Global Integrated Products Division.

Driven by the increased use of smart devices globally— and an explosion in the amount of data carried over wireless infrastructure— wireless carriers have invested significantly in upgrading infrastructure to ensure quality service. SDP solutions are used by top tier wireless infrastructure equipment makers to improve signal transmission efficiency over wireless networks.

“The acquisition provides a unique value proposition for deeper technical engagement with wireless equipment makers. Together Molex and SDP have many opportunities for growth in multiple segments of the wireless market,” adds SDP Telecom Founder and COO Shyam Gupta.
