AFRICAN CLEANING REVIEW – JUNE 2016

Goscor brings latest unveilings from ISSA/Interclean to SA

A delegation from industrial and commercial cleaning equipment provider, Goscor Cleaning Equipment, joined thousands of hygiene professionals at the 2016 ISSA/Interclean Amsterdam exhibition, held in May.

“We visited over 800 exhibitors who showcased their latest cleaning and hygiene products,” says Gregory Venter, General Manager of Goscor Cleaning Equipment. “We also networked extensively, particularly with our key suppliers who unveiled their new offerings and shared insights into global trends within our industry.”

Following the four-day expo, Goscor Cleaning Equipment has confirmed that it will be offering specific products that were launched at ISSA/Interclean. These include the new Tennant T300 automatic, walk-behind scrubber and the M17, a battery sweeper-scrubber; the G1 made by Green Machines; and Ghibli’s new ultra-compact scrubber dryer, called Rolly.

“These new products are top quality extensions to our existing range and offer the latest benefits in terms of operating efficiency, versatility and performance,” Venter expands. “Backed by our technical support and low cost-of-ownership sales offering, we are confident that these new machines will be well-received by our customers and the market.”

ENDS.
