

CSA Hubs And RPC Receives Boost With Kemach JCB Deal

Tuesday, 28 November 2017

On Monday 27th November 2017 CRICKET SOUTH AFRICA (CSA) welcomed Kemach Equipment on board as an official supplier on a three-year contract which will run until October 2020.

Kemach Equipment, the South African Dealer for JCB machinery, used for earth-moving purposes, will play an integral role in providing resources to maintain and upkeep facilities for CSA's Hubs and Standard Bank Regional Performance Centres.

The supplier deal will see Kemach Equipment providing Tandem Drum and Walk Behind rollers and training for groundsman across all 62 Hubs and Standard Bank RPC's.

"This will be another big boost for our development programme as we roll out more and more community hubs around the country," commented CSA Acting Chief Executive Thabang Moroe. "It is extremely heartening to see companies involving themselves at grassroots level and particularly in underprivileged areas where the need is the greatest.

"As costs continue to rise in maintaining and upkeeping of our facilities in underprivileged areas, this deal will go a long way to assist us in ensuring we develop the best talent in the areas as they will now have the resources to maintain their facilities. We welcome Kemach Equipment to our team of commercial partners and look forward to fruitful and long-lasting partnership with them," concluded Moroe.

Les Lothian, Kemach JCB CEO, commented: "We are really excited to be able to assist Cricket SA with the equipment needed to improve facilities which will develop talent in underprivileged areas and grow the talent pool."

Kemach JCB offers the best in earthmoving equipment, ranging from the backhoe loaders to skid steers, wheel loaders, excavators, telescopic handlers, rough terrain forklifts, and compaction equipment.

In addition to the equipment itself, Kemach JCB distributes the full range of JCB parts, while skilled field service technicians and expert product support engineers ensure that assistance is available at all times on a 24/7 basis.
