Motul to feature at Africa's leading CONEXPO trade fair

bauma CONEXPO AFRICA, the largest fair for Construction Machinery, Building Material Machines, Mining Machines and Construction Vehicles in Africa is coming to the Johannesburg Expo Centre from 13 to 16 March 2018. Attendees can look forward to learning more about the latest in high performance heavy duty lubricants when they visit the Motul stand (H6C50).

Motul's experts will be on hand to answer any questions relating to heavy duty lubricants and coolants and the trade fair represents an ideal opportunity to network with representatives from a company that has been in the industry for 165 years.

The Motul brand is present in many countries across the world through its products and services as well as production, research and development facilities.

Motul's Global Manager for Mining and Power Generation at bauma CONEXPO AFRICA this year, Keith Johnson, explains why mining industry experts should consider finding out more about Motul's range of products at the trade fair:

"Today's mining equipment often runs at maximum stress. Machine elements are unfortunately expected to run for prolonged periods. Conventional lubricants are, however, unable to withstand such demands. The result often is equipment breakdowns, which in turn can compromise project schedules and prevent a company from earning revenue," he points out.

Motul's greases, oils and fluids for mining address this challenge according to Keith.

"Our products are formulated to deliver outstanding equipment protection over an extreme range of temperatures and environmental conditions," he explains.

Motul Heavy Duty Business Development Manager for Africa, Patrick Bergman, who will also be answering product-related questions and advising on best practices around heavy duty lubricants and coolants, is confident that it will benefit industry professionals to stop by the Motul stand.

"It is a great idea for anyone looking to improve equipment performance, reduce Total Cost of Ownership and extend equipment life to come past our stand and speak to us," he concludes.

More about Motul:

Motul is a world-class French company specialised in the formulation, production and distribution of high-tech engine lubricants (two-wheelers, cars and other vehicles) as well as lubricants for industry via its Motultech activity.

Motul is also recognised as the specialist in synthetic lubricants. As early as 1971, Motul was the first lubricant manufacturer to pioneer the formulation of a 100% synthetic lubricant for automotive engines, the 300V lubricant, making use of Esters technology and issued from the aeronautical industry.

Throughout the years, Motul has gained experience as an official supplier to many racing teams and manufacturers and contributes with them to further technological development in motorsports.

Motul is supporting those teams in international competitions such as: 24 Hours of Le Mans (cars and motorcycles), FIA World Endurance Championship, IMSA WeatherTech SportsCar Championship, Super GT, Drift, Pikes Peak, Japanese championship Super Formula, Blancpain Endurance Series, Dakar, Tour Auto, Le Mans Classic, MotoGP, World Superbike, World MX, FIM Endurance World Championship, IOM TT, Roof of Africa and score of others.
