Reports

The *Research Channel Africa* publishes reports on key industrial and mining sectors. The reports for each sector are typically updated yearly. Reports are well structured and include an overview of the business environment, trends in the sector such as supply and demand, imports and exports, as well as regulatory challenges. Each report includes up-to-date information on major companies operating in the sector.

The following reports are available:

Industry

- Automotive
- Construction
- Liquid Fuels
- Projects in Progress
- Telecommunications
- Transport
- Water

Mining

- African Mining Projects
- African Mining Roundup (monthly)
- Australasian Mining Roundup (monthly)
- Base Metals
- Canadian Mining Roundup (monthly)
- Coal
- Diamonds
- Gold
- Iron-Ore
- Platinum

Projects

The *Research Channel Africa* tracks the largest industrial and mining projects under development in Africa and the rest of the world, providing an overview of latest project developments as well as contact information. Project information is regularly updated through ongoing interaction by the *Research Channel Africa* with relevant project managers and contractors. Project information can be sorted by industry or mining sector, location, value or date.

Sectors Covered

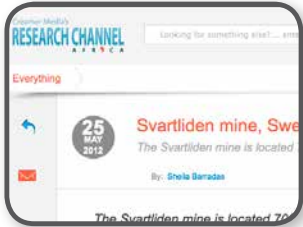

Industry

- Airports & Aviation
- Defence
- Electricity
- Oil and Gas
- Petrochemicals
- Science and Technology
- Sports Infrastructure

Mining

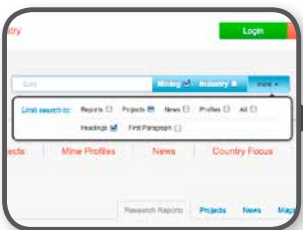

- Coal
- Diamonds
- Ferrochrome
- Gold
- Iron-Ore
- Nickel
- Platinum
- Uranium

Thousands of news articles, project updates, mine profiles and research reports are available on *Mining Weekly*, *Engineering News Online* and *MiningWeekly.com*.

Mine Profiles

The *Research Channel Africa* Mine Profile directory provides snapshots of more than 400 South African and international mining operations, including details on each operation's production level, ownership structure, geology and technology. Contact information for the mine operations is also available. The information is regularly updated through ongoing interaction by the *Research Channel Africa* with mine management.

Search

A refined search enables the execution of structured database searches of published material. The facility allows users to find articles, project information, mine profiles or research reports using words, phrases and timeframes. Users can also save up to 50 searches for future reference. The search criteria will be maintained, but the content will be updated as searches are undertaken.

Back Copies

The Back Copies section allows access to electronic versions of the print editions of *Engineering News* and *Mining Weekly*. Articles can be viewed electronically or a PDF format of the complete magazine, including advertisements, can be downloaded.

Country Focus

The *Research Channel Africa* offers up-to-date snapshots of all countries in Africa, including information on economic, budget and social developments, as well as details on various African industrial and mining projects.

Limited subscription option

Print subscribers to *Engineering News* and *Mining Weekly* can select a limited online subscription option, which gives subscribers access to the Advanced Search, Back Copies and Projects sections of *Research Channel Africa* only. To find out more email: subscriptions@creamermmedia.co.za

For a **Free** trial email: subscriptions@creamermmedia.co.za

Subscription Options

Subscriptions to Creamer Media's *Research Channel Africa* are available at a rate of R5 900 (excluding VAT) a year for a single subscriber, with discounted rates for multi-user packages.

Benefits of a multi-user subscription

- Access through a URL-key on your organisation's intranet
- No username & password to remember
- Sharing of the benefits of a subscription with more employees – allowing simultaneous usage and browsing of the site
